Period fo	The MAILING DATE of this communi r Reply	cation app	ears on the	cover sheet with the c	orrespondence ad	dress				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3754

DETAILED ACTION

Claim Objections

1. Claim 13 is objected to because of the following informalities: Claim 13 recites "the elastomer core" without proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 4,526,205 to Sugimura et al.

The patent to **Sugimura et al.** discloses a device for dampening pressure pulsations in a pressurized hydraulic system comprising a housing (1) enclosing a dampening chamber (15), at least one hydraulic connection opening into the dampening chamber, and a throttle device (25), wherein the housing and the throttle device form a damping unit that can be pre-assembled externally and can be anchored in a receptacle (18), as recited in claim 1. The throttle device (25) is threadedly

connected to connection device (16) that can be pre-assembled to the housing and the connection piece can also be threadedly connected to the receptacle (18).

Allowable Subject Matter

3. Claims 2-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Purcell, Trumper, Weber '756 and '514, Ruffer et al., Wilkes et al., Drumm, Lachaux, Greer, Johnson and Jones are all pertinent to Applicant's invention in disclosing damping devices having valving or throttling devices that can be pre-assembled onto the housing.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Patrick F. Brinson** whose telephone number is (571) 272-4897. The examiner can normally be reached on M-F 7:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Kevin P. Shaver** can be reached on (571) 272-4720. The fax phone
